

FRAMEWORK

TO FACILITATE THE RE-USE PROCESS

SAVE MONEY WHILE REDUCING WASTE TO LANDFILL

As we encourage producers to become more environmentally active, it is important to have a framework in place to guide their recycling processes and efforts.

This is where our Recyclers steering committee plays an important role. We will work with you to establish a recycling framework that meets organisational needs and helps promote compliance with environmental regulations.

At Lightcycle SA, we have created an ecosystem to encourage and assist organisations in doing just that.

If you are a Recycler and want to have your say, register below to be part of the discussion.
